QUICK SETUP GUIDE

Before using the TV, please read this guide thoroughly and retain it for future reference. For more detailed instructions, please see the User Manual.
Incorrect replacement of the battery may lead to the risk, including the replacement of another similar or the same type. Do not expose batteries to heat such as sun or fire or something like that.

The device should not be exposed to dripping and spraying and it cannot be placed under objects filled with liquids.

Main plug is used as the disconnect device, the disconnect device shall remain ready for operating.

**NOTES**
- Excessive sound pressure from earphones and headphones can cause hearing loss.

</tbody>
</table>
Installing the Stand

**CAUTION**

- Be sure to disconnect the A/C power cord before installing a stand or Wall-Mount brackets.
- The LED display is very fragile, and must be protected at all times when installing the base stand. Be sure that no hard or sharp object, or anything that could scratch or damage the LED display, comes into contact with it. DO NOT exert pressure on the front of the TV at any time because the screen could crack.

Follow the illustrations and textual instructions below to complete the installation steps:

1. Carefully remove TV and top cushion from the carton box. Put the TV with top cushion on the cushion, with its back upwards and the LCD downwards.
2. Remove the stand from the accessory bag and then Insert the stand into the bottom slots of the TV.
   **Tip**: Make sure to insert the legs according to the 'L' and 'R' directional marks that are shown on the surface.
3. Secure the Base Stand to the TV with the 4 screws in accessory tightly.

</tbody>
</table>

### NOTES
- The Picture is Only for Reference.
- It takes several seconds to power on the TV and load program. Do not rapidly turn the TV off as it may cause the TV to work abnormally.
NOTES

- Check the jacks for position and type before making any connections. Loose connections can result in image or color problems. Make sure that all connections are tight and secure.
- The TV may not be compatible with all external devices. To check compatibility, please refer to the user manual of external device.
- Do not connect external equipment while TV's power cord is plugged in. It may cause electric shock.
Making Connections

▶ ANT  Connect an outdoor VHF/UHF antenna or cable.

▶ COMMON INTERFACE
Insert the CI+ module for watching scrambled services like pay-tv channels or some HD channels.

▶ NOTES
- Before you insert/remove the CI+ module, ensure that the TV is switched off. Then insert the CI card into the CI+ module in accordance with the Service Provider’s instructions.
- Do not repeatedly insert or remove the Common Access Module as this may damage the interface and cause a malfunction.
- You must obtain a CI+ module and card from the service provider of the channels you want to watch.
- Insert the CI+ module with the SmartCard in the direction marked on the module and SmartCard.
- CI+ is not supported in some countries and regions; check with your authorized dealer.

▶ HDMI/COMP/AV
Connect a HDMI / Comp / AV cable from an external A/V equipment. No sound connection is needed for HDMI to HDMI connection. If the signal resolution does not match the specification table, you need to change the setting of device according to the table. Please consult your device user manual for instruction.
- To select the HDMI / Component / AV
Making Connections

**ARC**  Connect an HDMI cable from an external digital audio system.ARC enables the TV to directly output the digital sound through an HDMI cable. Please note that it works only when the TV is connected to the audio receiver that supports the ARC (Audio Return Channel) function. When this port is used as the ARC function, it can't be used as signal input at the same time.

**MHL**  Connect an MHL cable (not provided) from your MHL-enabled device, such as a cell phone.

**NOTE**
- HDMI 1 is special for MHL device. Some of nonstandard DVD players may not be supported.

**HEADPHONE**  Connect Headphone for audio out of the TV. The built-in speakers will be disabled once the headphone is connected.
Making Connections

- **DIGITAL AUDIO OUT**
  Connect an optical cable from an external digital audio system.
  Optical SPDIF is a type of digital audio interconnect cable used in consumer audio equipment to output audio over reasonably short distances. The signal is transmitted over a fibre optical cable.
  Before connecting a digital audio system to the Optical jack, you should decrease the volume of both the TV and the system to avoid that the volume suddenly become bigger.

- **USB**
  Connect the USB1.1, USB2.0 and USB3.0 devices such as hard drives, USB sticks and digital cameras for browsing photos, listening music and watching recorded movies. You can record live TV program (refer to PVR in user Manual). At the same time update is also an easy thing and will be done just by plugging the USB with the updating files into the USB interface.

**NOTES**
- When connecting a hard disk or a USB hub, always connect the mains adapter of the connected device to the power supply.
- If a USB 1.1 or USB2.0 device requires more than 500mA or 5V, the USB device may not be supported. Max supported current for USB 3.0 device is 1A. Exceeding the max supported current may result in damage or data loss.
- If you want to store the video streaming of a DTV program, the transfer rate of the USB storage device must not be less than 5MB/s.

- **LAN (Wired setup)**
  Connect your TV to your network by connecting the LAN port on the back of your TV to an external modem or router using a LAN (Ethernet/Cat 5) cable. See the illustration below.
Making Connections

· We recommend to use a modem or router that supports Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS, so you don’t have to enter them manually. Most home networks already have DHCP.

Wireless setup
Connect your TV to your network wirelessly, you need a wireless router or modem. See the illustration below.
· The TV’s built-in Wireless LAN Adapter supports the IEEE 802.11 ac/b/g/n communication protocols. We recommend using IEEE 802.11ac router. Low transfer rates for b/g/n may have the influence on the quality of streamed videos and other media.

NOTES
· You must use the built-in Wireless LAN Adapter to use a wireless network because the set doesn’t support external USB network adapter.
· If the wireless router supports DHCP, your TV can connect more easily to the wireless network.
· If you apply a security system other than the systems listed below, it will not work with the TV.
· In order to guarantee smooth network, the distance between router and TV is less than 10 meters.
Remote Control

1. POWER: Switch the TV on or into standby mode
2. Special function buttons direct selection of options
3. Adjust the volume
4. To speak a voice command press and hold the VOICE button and say a voice command
6. OK: Confirm the selection in the OSD menus
7. BACK: Return to previous menu
8. HOME: Enter the Smart
9. CH + /-: Switch channel
10. Media content control function buttons
11. Receive the voice
12. INPUT: Select input sources
13. KPAD: Brings up the virtual keyboard.
14. EXIT: Exit the menu

► Installing Batteries in the Remote Control

1. Lift the back cover to open the battery compartment of the remote control.
2. Insert two AAA size batteries. Make sure to match the (+) and (-) ends of the batteries with the (+) and (-) ends indicated in the battery compartment.
3. Close the battery compartment with the cover.

1. Remove the battery compartment cover
2. Insert the batteries
3. Close the battery compartment cover
Pairing the Remote Control

Keep the remote control close to the bluetooth device pairing. Press the voice key to open the voice control function and hold the blue button until the red light on the remote control remains lit, and wait until the remote pairing is complete.

If the remote control pairing is successful, the Screen will appear "Remote control pairing is successful. Welcome to experience".

If the remote control pairing fails, the screen will appear "Remote control pairing fails. Please try again".

NOTES

- Pairing the remote control from the bluetooth device pairing needed within 10cm.
- When the TV into standby mode does not support Bluetooth pairing.
- If you want to release pairing, hold the blue button, the indicator light flashes purple and then disappears, if the remote control unpairing is successful the indicator light will turn red when press any button on the remote control.

Voice Control

Press the voice key to open the voice control function. Press the voice key, the screen outgoing voice helper, then you can enter a voice command, the corresponding voice control function will be executed. After a period of time no longer the voice input, the remote control automatically turns off Mike.

Please strictly for voice control operations in accordance with the following voice commands. If you perform the non-provision of voice command, there will not recognize the voice Case commands.

Supported audio content

- **Volume Control**
  - For example, Set volume to 25 / Volume 10 / Volume up / Mute.
- **Channel Switching**
  - For example, Channel 3.
- **Source switching**
  - For example, Change to HDMI2 / Switch input source.
- **System Setting**
  - For example, Open settings / Audio settings / Start the network settings menu / Go to picture settings.
- **Application Management**
  - For example, Youtube / Open Youtube / Start Youtube.

NOTE

- When a voice conversation from the microphone hole best of 10cm ~ 15cm.
Remote Control

Installing Batteries in the Remote Control

1. Slide the back cover to open the battery compartment of the remote control.
2. Insert two AAA size batteries. Make sure to match the (+) and (-) ends of the batteries with the (+) and (-) ends indicated in the battery compartment.
3. Close the battery compartment cover.

1. Gently push and slide
2. Insert the batteries
3. Gently push and slide

NOTES

• Product image is only for reference, actual product may vary in appearance.
• Dispose of your batteries in a designated disposal area. Do not throw the batteries into a fire.
• Do not mix battery types or combine used batteries with new ones.
• Remove depleted batteries immediately to prevent battery acid from leaking into the battery compartment.
• If you do not intend to use the remote control for a long time, remove the batteries.
• Batteries should not be exposed to excessive heat, such as sunshine, heat registers, or fire.
• Battery chemicals can cause a rash. If the batteries leak, clean the battery compartment with a cloth. If chemicals touch your skin, wash immediately.

Remote Control Operation Range

1. Point the remote control at the TV within no more than 5 metres from the remote control sensor on the TV and within 60° in front of the TV.
2. The operating distance may vary depending on the brightness of the room.
Turning the TV on for the First Time

1. Connect the mains cable to the mains socket after you have completed all the connections.

2. The first time you turn the TV on, it will go straight into the Installation Guide. It will assist you to specify the Language, Location and Network.

3. Press the [↑ / ↓ / ← / →] to navigate the menu and change the settings. Press the [OK] button to confirm.

<table>
